

General Description:

The JTR microphone model DXL-845 has a 416 ohm cartridge and a frequency range of 50 to 20,000 Hz in the series of super cardioid microphones. The mounting connector at the bottom of the microphone is made of gold plating and plays a role in creating an effective connection between the cable and the microphone, so this microphone can be considered a real low noise.

Technical Features:

Cartridge type: Dynamic
Polar pattern: super cardioid
Impedance: 416 ohms
Frequency range: 50 to 20000 Hz
Sensitivity: -68 dB
Microphone dimensions: 24 x 185 mm
Package weight: 700 grams
