

General Description:

Soundco speaker cable model 2040, 100 meter loop, has two layers of PVC coating, in addition to maintaining the wire strands inside the cable, it maintains high tolerance in cold and heat. The thickness of the coating used is 6+6 mm, the use of pure copper in the Sandco speaker cable and the number of strands on the top of the wire 254+254 has been effective in conductivity and non-decrease in ohms over long distances.

Technical Features:

Cable length: 100 meters
Cable type: 2040
Cable material: all copper
Cable specifications: 254+254
Cable thickness: 6+6
Cable color: Copper + silver glass
Cable application:
Connecting the speaker to the echo amplifier, connecting the speaker to the power mixer
