

General Description:

The JM-3133 BG JTR headphone plug is a 3.5 mm connector suitable for repairing and renovating the headphone plug or creating an aux cable to connect a mobile phone or laptop to the players. This connector is made of copper material with gold plating. The very good conductivity and solderability of this connector is the result of using a gold-plated coating on the body of this connector.

Technical Features:

Connector type: Mini TRS
Body Material:
Gold-plated copper plug
Product color:
Black
