

General Description:

The JTR HC650 headmic microphone is a condenser microphone with a super mini capsule and very high sensitivity in the frequency range of 30 Hz to 18000 Hz. The use of such microphones is common for educational purposes and podcasts, clips, teasers and dubbing or even journalism.

Technical Features:

Microphone type: Hedmic
Cartridge type: magnetism
Microphone polar pattern: unidirectional
Frequency range: 30 to 18000 Hz
Microphone impedance: 1000 ohms
Body Material: metallic
Product color: cream
Cable length: 10 meters
Output port: Mini TRS
Power supply:
3.5 mm laptop or mobile port
