

## General Description:

JTR wireless microphone model UEM 991 is a professional diversity wireless microphone, two antennas, on UHF width and frequency range of 740-790 MHz, with 100 variable digital channels, with very high antenna coverage in closed space up to 100 and open space up to 150 meters.

## Technical Features:

Microphone type: handheld  
Number of receiver channels: one channel  
Cartridge type: Dynamic  
Microphone polar pattern: Cardioid  
Microphone impedance: 600 ohms  
Frequency range: 80 to 18000 Hz  
sensitivity : 100 decibels  
Power supply: 2 double A batteries  
Required voltage: 3 volts  
Required receiver voltage: 15 volts  
Frequency band: UHF  
Frequency range: 740 to 790 MHz  
Motghiz channel: 1\*100 channels  
Number of antennas:  
2 telescopic antennas
