

C1000 Microphone Cartridge

General Description:

Soundco C-1000 microphone capsule is suitable for repairing and servicing all types of handheld microphones. Improper use of the microphone, shock, moisture, as well as excessive entry into the microphone capsule or removal of the microphone basket, and even the breakdown of cloth and sponge filters inside the microphone, are all effective factors in the deterioration of the microphone.

Technical Features:

Cartridge type: Dynamic
Microphone polar pattern: Hypercardioid
Frequency range: 70 to 13000 Hz
Microphone impedance: 600 ohms
Sensitivity: -50 dB
Body Material: Plastic, metal
Product color: Black and Orange
Product weight: 35 grams
