

## S518 Female TRS Connector

### General Description:

S518 Female TRS Connector is an installation terminal for inserting all types of TRS plugs into audio devices or installing in a speaker cabinet to connect audio cables from an echo amplifier or power mixer. The body of this connector is made of metal, the input of the plug has a latch designed to lock the TS or TRS plug to prevent the momentary removal of the connector due to the intensity of the bass sound in the speaker cabinet.

### Technical Features:
