

## 3010 Microphone Cable

### General Description:

Soundco 3010 Microphone Cable is designed and produced suitable for the production and repair of all types of collar microphone cables. With this stereo cable, you can make a quality aux interface and get rid of low-quality pressed cables on the market that break after a few uses. This aux wire can be produced in any length and regardless of any noise or quality loss, because you are dealing with a specialized standard all-copper audio cable.

### Technical Features:

- Cable length: 200 M
- Cable type: microphone cable
- Cable material: all copper
- Cable specification: 25+14\*2
- Cable thickness: 3.2 mm
- Cable color: black
