

NX1400 Power Amplifier

General Description:

NX1400 power amplifier is an audio amplifier equipped with a smart display with an effective power of 5200 watts in two stereo channels that can easily drive up to eight 650-watt speakers with an impedance of 8 ohms.

The intelligent design of the amplifier circuit will be 1000 watts when connecting one speaker with an impedance of 8 ohms. If two speakers with an impedance of 8 ohms are connected with a power equal to 1400

Technical Features:

Device type: Rack mount

Amplifier type: H CLASS

Amplifier power: 2*2600 watts

Input port: XLR

Output port: SPEAKON

Cooling fan: Equipped with a variable speed cooling fan

Power source: City electricity

Required voltage: 220 volts

Body material: Aluminum, metal
